

GENERAL SCHOOL CLASS SCHEDULE

Class Levels and Progression

Level B

- ◆ For students who are just starting out, this level focuses on establishing a strong foundation. Dancers build motor skills and coordination awareness, develop a sense of rhythm, and learn how to move within a structured class environment – all while discovering the joy of dance in a fun, supportive setting.

Level A

- ◆ Placement to this level is determined by teacher recommendation. For students ready to build on the foundation established in B. This level focuses on strengthening technique and coordination while introducing a deeper connection to music. Dancers begin to understand musicality and gain confidence as they take on more challenging movement combinations in a structured class environment.

General School ADV

- ◆ Acceptance to this level is by audition only. For students ready to refine and elevate their training. This level emphasizes precision, strength, and control while continuing to deepen understanding of musicality and execution. Dancers expand their technical range, interpret music with greater nuance, and meet higher expectations in performance, discipline, and artistry.
